Free Small-Business Cybersecurity Webinar Set

By [517 Staff](#) | [News](#), [Business](#)

Small-business owners are invited to a free one-hour webinar hosted by the [Michigan Small Business Development Center](#) at 11 a.m. March 27 to learn more about cyberthreats and risks to small businesses, how to create an incident response plan and what to do once it is in place.

Michigan SBDC Cybersecurity Specialist Scott Taber will lead the webinar.

“It’s an unfortunate reality that no one wants to think about cybersecurity until it’s too late, but it’s imperative that small businesses have an incident response plan in place just in case,” said Taber. “We’re excited to team up with federal and state agencies to raise awareness of not only the risks for cyberthreats, but also the resources available to small businesses to thwart them.”

Webinar special guests include Andy Brush, cybersecurity adviser for the [Cybersecurity and Infrastructure Security Agency](#), and Brandon Smith, cybersecurity intelligence analyst for the [Michigan State Police](#).

More information and registration for the webinar are available at bit.ly/3FEliAD. Participants are encouraged to submit questions in advance for the question-and-answer portion of the webinar.
